

RECYCLED PAPER NAPKINS

- 100% compostable
- 100% recycled content
- Unbleached
- Packaged in paper

100% COMPOSTABLE - EVEN THE PACKAGING!

The recycled kraft paper packaging completely protects the napkins, while also avoiding the use of less planet-friendly packaging which can take hundreds of years to break down.

Greenlid's recycled paper napkins are made from 100% post-consumer recycled content and help to eliminate the need for cutting down new trees and harvesting fresh materials.

Paper napkins are naturally light brown. Our napkins don't use harmful bleaching agents, so reduce the number of chemicals introduced into your home. Unbleached napkins require less energy to make, are less processed, and are better for the environment.
